

**MALONE CAMPBELL ROAD FACILITY, TEXAS CITY, GALVESTON COUNTY, TEXAS**

**Week ending 09/06/2015**

On July 6, 2015 FOSC Zehner initiated an emergency pump down of contaminated storm at the facility which was authorized by the R6 Superfund Division Director. The initiation of emergency actions were necessary to abate the imminent and substantial threat of discharge of several hundred thousand gallons of contaminated storm water located on the Site from several multi-inch rainfalls associated with Tropical Storm Bill and other sub-tropical weather fronts that had impacted the Site during May and June of 2015. On-site disposal well WDW-138 began operations on July 6, 2015. The FOSC also authorized the operation of the additional on-site injection well WDW-73. Recent rains have increased the total stormwater volume onsite. The Site received 10.25 inches of rain in 3-days the week of August 24, and 6 inches of rain the week of August 31. Both injection wells (WDW-138 and WDW-73 are operational. Both wells received injectate from August 31 through September 6. A total of 275,165 gallons of stormwater was injected this week.
